**Letter of Recommendation for Ali Emre Aksoy
Born in Ankara, Turkey on the 5th of November 1998**

To whom it may concern,

Mr. Aksoy, born in Ankara, Turkey on the 5th of November 1998, worked at the Institute of Flight System Dynamics (FSD) for eight months in 2023 under the supervision of Michael M. Marb as a part-time student research assistant on the application of Koopman Operator Theory.

He displayed outstanding work ethics, technical ability, and applied his knowledge in an independent and self-directed manner in this challenging field.

Currently, Mr. Aksoy continues his studies in Mathematics at the Ludwig-Maximilians-Universität (LMU) in Munich.

Mr. Aksoy has also proven his capability to work as a team player and was well-received and respected by fellow students and institute staff. Considering his potential, aptitude, and keenness to learn, I can wholeheartedly recommend Mr. Aksoy and wish him all the best in his future pursuits.

Sincerely,

Prof. Dr.-Ing. Florian Holzapfel

Michael M. Marb (M.Sc.)
